Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Richard Love
Address	RODNEY CRESCENT, 36, RODNEY CRESCENT, ARUNDEL, BN18 0DB
Type of Comment	Objection
Comments	I wish to object to the proposed energy recovery facility. Myself and my family with young children live within half of a mile of this site and it worries us that this will be allowed to go ahead. It will be far too close to existing properties and even closer to the proposed housing developments on the Ford Airfield near to Yapton. The emissions and odours that will be produced by this ERF must surely be harmful so how can it be acceptable to those living within the immediate area or even those living slightly further afield such as Arundel, Barnham, Rustington or even Bognor Regis. Our eldest has asthma, how will she be affected? With regards to traffic; the roads surrounding us are already busy enough and with all the addition lorries using the main road that we use to walk by or cycle along to take our youngest to Clymping school it will be unbearable and increasingly dangerous. Finally, the sheer size of this facility will be visible for miles around which will have a hugely negative effect on the area. The beautiful area of Arundel with it's stunning Cathedral and Castle, the river Arun and the stunning beaches we have on our door step will all be affected by this.
