I want to object to the additional information submitted to their application stated above regarding the clay quarry & construction material & waste recycling facility.
I cycle along the Loxwood road three times a week to work. Six journeys in total.
It is bad enough with cars passing at speed but to then possibly allow more traffic in the form of lorries (approx 42 a day) to use this road would be extremely hazardous. One would seriously have to consider if cycling or walking along that route would be possible.
At a time when fresh air & mental wellbeing has been proven to be beneficial this application should not be passed. This should not be about money but of safety & one's health.
I know many have the attitude of "not on my doorstep" but frankly the Loxwood road is simply not wide enough to take a plethora of heavy goods vehicles.
Thank you for taking the time at looking at my objection.

Kind regards
Christine Rosher
