Dear Sirs,

Re: Application for Arun Valley Rubbish Incinerator

Whilst you have a duty to consider this application, you also have a legal and moral duty to reject it.

How on earth can anyone in their right mind even think of building an incinerator of such size and filth in this day and age is completely beyond me.

COP 26 in Glasgow, in November is a showcase event. This application is, in effect, raising two fingers to it.

Then there is the issue of traffic. Ford Road is already overloaded. It will become worse by far if the proposed housing development is permitted. This is BEFORE one considers the vast number of HGV movements if this application is granted.

Finally, what consideration has been given to blighting the landscape with this monstrosity?

I have precious little faith as it is in the planning process. Please prove me wrong.

Yours faithfully,

Christopher Boyce
