Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Nicola Tester
Address	THE GRIBBLE INN OVING WEST SUSSEX PO20 2BP
Type of Comment	Objection
Comments	I object to this project because this enormous building (40m) its 2 towers (85m) and the visible plume 50-100m on top of the towers will have a negative effect on the whole area. It will be as visible as the Spinnaker tower set in the only undeveloped stretch of coastline between Bognor and Brighton. I am also against it personally as it will effect the neighbourhood plan and district plan supported new community of 1500 dwellings, Primary school, Secondary school and associated facilities that I have been working on for 20 years now. There is an existing permission on the site for a much smaller and more advanced technology gasification plant that would not have the impact that this proposal has. It would create the same number of jobs. Incineration is the most polluting form of energy generation that is in existence. It produces more than double the amount of CO2 than coal does to get one unit of electricity. Incineration also diverts plastics away from being recycled and breaks the circular economy, which is the only long-term solution to our waste.
