Comment for planning application WSCC/011/21

Application number	WSCC/011/21
Name	Karin Moorhouse
Address	SCHOOL LANE, 1, SCHOOL LANE, ARUNDEL, BN18 9DR
Type of Comment	Objection
Comments	This enormous building (40m) its 2 towers (85m) and the visible plume 50-100m on top of the towers will have a negative effect on the whole area. It will be as visible as the Spinnaker tower set in the only undeveloped stretch of coastline between Bognor and Brighton. I am also against it personally as it will effect the neighbourhood plan and district plan which supports the new community of 1500 dwellings, Primary school, Secondary school and associated facilities which I have supported for 20 years now. There is an existing permission on the site for a much smaller and more advanced technology gasification plant that would not have the impact that this proposal has. It would create the same number of jobs and make the process far cleaner for all concerned. Incineration is the most polluting form of energy generation that is in existence. It produces more than double the amount of CO2 than coal does to get one unit of electricity. It is totally out of place in this mainly rural and agriculture environment. The extra traffic on all the local small roads is unacceptable and will be seriously detrimental to the health of all who live in the highly populated local villages. The local roads are already over used by HGVs. Both this problem and the lack of refinement of the particulates being burned will add even more negative health issues. In the case of the smoke the wind direction is mainly northward away from the sea and directly towards where people live..... namely Binsted Arundel Walberton Slindon to name but a few! Incineration also diverts plastics away from being recycled and breaks the circular economy, which is the only long-term solution to our waste. All in all I object most strongly and as a former ATC councillor made our objections to the former application clear at the time. Opinion hasn't changed other than to be even more vehemently opposed to his new application Thank you Karin Moorhouse
