I STRONGLY OBJECT TO THESE PROPOSALS FOR THE FOLLOWING REASONS:

Nothing in the proposals has changed my view that there would be major environmental damage to this treasured rural site. The damage to local wildlife would be immense due to the industrial scale of the proposed operation in this peaceful site which includes some rare and threatened species.
As well as the amount of disruption caused during the construction of the site ,the ongoing effects of the operation will have a negative impact to the area, in terns of HGV movements on rural roads over a period of 30 years. Safety concerns have been raised about the major increase of heavy traffic over unsuitable rural roads .The actual operation at the site is likely to cause noise and disturbance in terms of machinery and earth moving equipment. The proposal for a large industrial building in an area of no other industrial buildings or development , will cause some light pollution which will make a significant impact on a peaceful rural location.

If this operation is approved, it will have a major detrimental impact on a tranquil rural environment and surrounding villages. The peaceful rural nature and ancient woodland will be lost forever in this totally unsuitable location. it will have a lasting detrimental impact on the local wildlife in this rural setting.
