Subject: Objection to Loxwood Clay Pit. Dated 9th of Feb.2022
Date: 08 February 2022 17:41:36

I understand that transport Consultants advise that the applicant is underestimating the number of vehicle movements on Loxwood Road.We live about less than 3/4 of a mile
from the lay-by on Loxwood Road.This fleet of trucks day-in and day-out would substantially increase the pollution, ruining the road way beyond its already poor state and
creating potential for accidents!
I am most concerned about the potential "Conflict of interest" for the Council between the clear message to do more for the environment, to plant tress and create more space
for biodiversity and on the other hand being offered the opportunity to create a large "Waste and recycling facility" in the midst of a forest full of wild life and used by a
large number of people to walk in the woods and enjoy nature.
