> Our house is on Loxwood Road which is on a winding country lane used by horse riders, lots of cyclists and ramblers
> HVC lorries, transporting heavy equipment and materials is most dangerous and inappropriate for this road
> The noise of excavation and dust created unacceptable apart from destroying beautiful woods, enjoyed by humans and animals alike.
> There is no value of Weald clay in Surrey or Sussex , transport of it would far exceed the profit of the clay. Wienerberger has their own suppliers
> The woods are accessed by people living in Sussex as well as Surrey depending if you live in Ifold or Loxwood as our borders are so close ! So everyone is deeply affected around here.
> Our 13th century grad 2 listed farmhouse is in danger of subsistence with the constant
> vibration from heavy lorries
> I hope this dangerous project will be rejected
