Subject: WSCC/030/21 Loxwood Clay Pits - Objection
Date: 09 February 2022 11:44:24

I have read the recent submission and can only re-iterate my total objection to this proposal.

Everywhere on the news you hear about how many trees need to be planted to combat carbon emission and yet, purely for financial reasons the owners of these woods want to dig them up and replace with a noisy commercial industry. We need to protect our woods and our environment. We do not need brickworks. It won't bring extra prosperity for Loxwood and surrounding villages. The extra traffic of huge lorries will be appalling. I have written and objected before and it still stands!

PLEASE, PLEASE, PLEASE, stop this application.
