Dear Planning Department

Planning Application Ref: WSCC/028/21

I wish to record my objections to the above application on the following grounds.

It will be a health hazard through airborne disease and noise pollution.

There will be a massive increase in heavy haulage vehicles which will be both dangerous & polluting. The A283 is not designed to take hundreds of heavy lorry. The Road is too narrow, with lots of sweeping bends and currently has a large number of accidents annually. There is a School very near by. The plan does not contain adequate measures for the protection of wildlife that exist in the quarry.

It would be detrimental to this beautiful area which is close to the South Downs National Park & cause a huge amount of disruption & stress for all the local people and damage the local tourism industry.

Kind regards

Anita Hambrook
