Comments : OBJECT for the following;  
Dust controls for the site are inadequate and are having a negative impact on the properties and businesses surrounding the site. The dust management plan needs to be adhered to and checks made regularly, to protect the amenity of residents, and the environment.  
Air quality tests need to be done to protect the amenity of residents, and the environment.  
Stockpiles are above the 2014 permitted level of 3 metres and have a negative visual impact on neighbouring properties.  
The wheel washing facilities are inadequate and not in a location that allows all vehicles exiting the site to be cleaned, which would help keep dust off the A259.  
Boundary fences are in a state of disrepair allowing stockpiles to overflow, therefore not protecting the environment of the surrounding land.
