

Comment for planning application WSCC/028/21

Application number	<input type="text" value="WSCC/028/21"/>
Name	<input type="text" value="Brian Allen Frank Clarke"/>
Address	<input type="text" value="Triangles Mill Lane Ashington W. Sussex"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>The biggest threats are:- That the proposed lining to prevent polluting the aquifer beneath this site cannot be foolproof, if it fails it will be unreparable. This was a major factor in the rejection of the first Planning Application using the example of a lining failure at a site in the north of England. The Washington roundabout where the A283 crosses the A24 is already very congested and the possible flow of 500 bulk carriers per day is alarming, particularly those using the A283. This is part of the Southdowns National Park and this development goes against the whole ethos of it.</p>
