

Comment for planning application WSCC/028/21

Application number	<input type="text" value="WSCC/028/21"/>
Name	<input type="text" value="Carmen Alexandra Lavin"/>
Address	<input type="text" value="Ketrey Woodpecker Lane, Storrington, West Sussex, RH20 4DB"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>The proposed Washington landfill will affect all our lives in Storrington. Already the A283 carries an exponentially growing volume of road traffic, and an extra five hundred and more lorries every day will increase risks to road safety and generate long traffic tailbacks.</p> <p>Furthermore, the increased levels of pollution will have devastating effects on health and on the environment, just at a time when any threat to environmental concerns and health, locally and globally, is becoming very grave indeed, and is high on everyone's agenda of concerns for the future. Dust, noise and pollution will have colossal effects on lung conditions in the population, from small babies to the very old, and put even more pressure on medical facilities. Hedges, trees and bird and wildlife will also suffer commensurately.</p> <p>The risk of a landfill project like this of polluting the aquifer running below the quarry will be immense and this will endanger homes supplied with fresh water from the aquifer from Brighton to Portsmouth. For all these reasons I object to the application for the Rock Common quarry, Washington landfill.</p>
