Comments	<input type="text" value="I am a regular visitor to Washington Caravan and Camping Park in Washington. I was extremely disappointed to read the proposals for the nearby quarry and object strongly to these proposals. The considerable increase in the volume of traffic associated with the transportation of materials (some 300-500 trucks a day) to the site will have a totally unacceptable impact on the nearby highways. Obviously, the addition of that number of vehicles to the area will result in a huge noise increase from engines, air brakes, gear changes, back up alarms and the processing of the inert material. This will destroy the quiet enjoyment of all local residents and will have a detrimental effect on the Washington Caravan and Camping Park business."/>
