Objection

We object to this application. Experimental raised wetland with unnecessarily large amounts of infrastructure will appear incongruous within this rural AONB setting. Whilst we approve of Southern Water's attempt to ultimately improve water quality in the Ouse we cannot understand why the upgrading of existing facilities at Staplefield is not being considered. There has been no attempt by Southern Water to engage with the community on a project that will alter the village so fundamentally. Heritage assets within the site will be lost, nearby listed buildings affected and wildlife destroyed. There is no information on how the functioning of ICW will be affected by heavy rainfall and saturated ground or, indeed, what we are to expect during excessively dry periods. Is Staplefield to be blighted by odours and files during the summer? At the very least we would have expected a consultation in the village hall with representatives from Southern Water available to discuss the impact of such a development on our doorstep.
