

Comment for planning application WSCC/028/21

Application number	<input type="text" value="WSCC/028/21"/>
Name	<input type="text" value="Edward Mills"/>
Address	<input type="text" value="THE MANDARIN, BADGERS HOLT, BADGERS HOLT, PULBOROUGH, RH20 3ET"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>Yet another distasteful attempt to mislead both planners and local residents. This application is dishonest with its deliberate aim to hide the real purpose of the application.</p> <p>The scheme is a landfill operation that will dump all forms of consumer and industrial waste into an area of Outstanding Natural Beauty that is part of the South Downs National Park for the financial gain of the landowners and the operators. Washinton is a rural community and not a dumping ground for waste.</p> <p>The owners of the disused quarry and the previous operators should be required to repair the damage they had previously caused to the countryside and to re-instate its condition before quarrying was permitted and not to further scar the countryside.</p> <p>Local residents would be subjected to an unacceptable increase in noise and air pollution together with the inevitable long term pollution of underground waterways.</p> <p>The increase in large commercial traffic to and from the site would further increase congestion on the narrow local rural road network.</p> <p>There are no gains for the local residents nor the environment and many negative impacts and I totally object to the application.</p> <p>Edward Mills</p>
