

# Comment for planning application WSCC/028/21

Application number	<input type="text" value="WSCC/028/21"/>
Name	<input type="text" value="Frank Hawkes"/>
Address	<input type="text" value="LITTLE BARTON, HAMPERS LANE, HAMPERS LANE, PULBOROUGH, RH20 3HZ"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>Dear Sirs, This is yet another planning application which appears to be a "disaster waiting to happen", if approved. The detrimental environmental impact (over the next 50 years from what I have read) would be verging on the criminal. Road safety and traffic increase (by huge HGVs !) would add to an already dangerous situation on the A283 and surrounding roads, as well as adding to the existing high levels of pollution, as these HGVs tend to be diesel fuelled. No "electric" powered HGVs appear to be "on the horizon" in the mid to long term future. In the meantime, we and our children, have to put up with noxious fumes and, in my opinion, rather dangerous traffic conditions in what is supposed to be a pleasant semi-rural wildlife and people friendly environment.</p> <p>As a member of the Conservative party, I will be drawing this to the attention of Andrew Griffiths, our M.P. , whom, I am sure will also agree that such an application should never be approved. I advise all local residents to do the same and write to Andrew with as much detail as you can obtain.</p> <p>The WSCC should, in the interest of voters and the environment etc., as referred to above, "strike this down" and ensure it "never sees the light of day" ever again. If they do not, then I am sure most will join me in voting for alternate candidates at the next council election.</p>
