Type of Objection

I am still concerned about the type of material that is to be deposited on the proposed location. The application should have detail on what constitues 'treating imported material' which may have a detrimental effect on an outstanding area of natural beauty.

I would also say that despite the traffic report undertaken, the A283 is becoming ever more dangerous with it's winding roads which has has been demonstrated recently by the lorry derailing off the A283 near Wiston. This has caused environmental damage to the surrounding area which demonstrates that, with increased heavy vehicle traffic, this brings increased risks to both safety and the environment. No matter where the entrance and exit is for the proposed importation of inert material, the A283 will have increased traffic, which includes that of many daily school buses, as a result of these proposals. Please take these points into consideration when making your decision.
