

# Comment for planning application WSCC/028/21

Application number	<input type="text" value="WSCC/028/21"/>
Name	<input type="text" value="Gavin Jenkins"/>
Address	<input type="text" value="CHANCTONBURY CLOSE, 3, CHANCTONBURY CLOSE, PULBOROUGH, RH20 4AR"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>My objections are based upon the following-</p> <p>Traffic generation - the A24 and A283 are already exceptionally busy and additional non-environmentally friendly lorries will generate additional toxic fumes and increased noise which will add to an already over-polluted area.</p> <p>Effect on landscape - the proposal risks damaging the area of natural beauty and the surrounding wildlife which will affect the quality of life for the nearby residents. The existing landfill site is already having a detrimental effect on the environment, with toxic waste bleeding from the site into the nearby Honeybridge stream and this application would make matters worse should the aquifer under the quarry be damaged due to pressure of the landfill, risking the quality of drinking water for residents on the South Coast.</p> <p>Highway safety - the additional slow-moving lorries will cause additional risks to safety, whether they enter or leave from the A283 or the A24 where the Washington roundabout already is an accident black spot.</p> <p>Please can you take into account these strong objections when considering the application.</p>
