I am horrified that yet again an attempt is being made to introduce a landfill scheme in an area bounded by a National Park which is rich in fauna and flora that needs protection NOT decimation! The natural aquifer in this area is already at high risk of pollution and this scheme will only exacerbate the situation further. The local roads are already at breaking point much of the time and the increased traffic that a scheme like this will entail will put lives at risk and the additional pollution that it will introduce will have a terrible effect on the natural habitat.
