Objection

I disagree with the extension of the waste transfer facility, Recycle Southern Ltd. I have previously raised complaints about the dust that is produced by Recycle Southern Ltd during the transfer of waste. It has come to a point where I am concerned for the wellbeing of my family, neighbours and pets as we are worried that inhaling the dust could lead to health issues such as respiratory problems. My former neighbours have left their property out of frustration with accumulation of all the dust, I share those concerns as I have 2 children and 2 pets, and the dust collects on all surfaces on my property including the children's toys, outdoor furniture as well as my car. I am forced to clean everything on Sunday, as the company operates on all other weekdays meaning I cannot dry my laundry outside or open windows in the house as the dust enters my house and collects on the furniture, this issue has been worst with my 10-year-old daughter's bedroom, and is especially troublesome during the summer heat.

I have noticed the attempt to reduce the amount of dust on the road and the cycle path through the installation of a water sprinkler however, is has shown not to be effective and in fact created more issues. The constant flowing water on the road combined with the frequent use of it by large transport vehicles that belong to the company has caused the public road to be damaged. I am concerned that the expansion of the company could cause road incidents due to the constant entry and exit of the large company vehicles which slow the traffic on the main road as they make a turn, this is with the combination of the damaged road and reduced visibility due to the dust. These are all the issues we are experiencing now, and they will inevitably worsen if the expansion of the company takes place.
