## Comment for planning application WSCC/021/23

Application number	WSCC/021/23	
Name	Lorna J	
Address	Babsham Lane	
Type of Comment	Objection	

It appears that RSL are already expanding even before this retrospective planning permission has been permitted.

They have just taken over a skip company with a capacity of over 250 skips which will impact upon the input and output from the site, the traffic in the local area and Babsham Lane.

I have heard - via someone with close RSL connections - that RSL are willing to 'chase' retrospective applications to ensure expansion takes place e.g., this won't be the first or last application to come about.

I have read on the RSL latest news that WSCC are approving of the site at Elbridge I do hope that they remain impartial when making a decision and realise that they have not kept themselves up to date with all matters that have been raised thus far.

A closer eye should have been kept on this company and their operations to ensure that they are keeping to quidelines/conditions set.

I do hope that the concerns residents have shared regarding this company are taken into account when determining this application.
