## Comment for planning application WSCC/016/24

Application number	WSCC/016/24	
Name	Marcus Gorman	
Address	THISTLEWORTH FARM, WORTHING ROAD, WORTHING ROAD, HORSHAM, RH13 8NR	
Type of Comment	Comment	
Comments	2 areas of concern are not addressed adequately in the planning application: 1) Light pollution - there is currently a degree of light pollution from this site caused by a tall floodlight which should be switched off when not needed. I would like to be assured no further light pollution will be caused by the new plant installation. 2) Noise - there is only cursory mention, in the application, that the new plant will be no noisier than the current one. I would like to see something more definitive in the application regarding noise levels. There were assurances in the previous planning application for the installation of a concrete crusher that it would create minimal noise given the creation of an earth bund and acoustic fences. This has turned out to be untrue.(similar noise to a railway line), hence my scepticism that this new plant will not create yet more noise in the vicinity. My (listed) property is in the noise vicinity of Penfold Verrall's yard.
