Objection

We are contacting you to strongly object to the local application for Rock Common Quarry. The inevitable gross disruption to the local road system involving many heavy lorry transportations of material causing untold traffic chaos to already over burdened road systems for a considerable time. In view of the current push to reduce air pollution this would provide an unwelcome addition to the pollution in the local area. Ref the existing approval to create a lake in the quarry being dangerous!! -- What sort of Society are we becoming? I suggest constant transportation of heavy lorries over a considerable time to be far more dangerous -encouraging tale backs on the local roads with the cosequent frustration of drivers.
