I object to the proposal by Dudman and The Wiston Estate.

Specifically the importation of inert classified engineering and restoration material, the stockpiling and treating of same.

The site should not be used as a tip for inert classified engineering and restoration material; and the stockpiling and treating of same is turning a quarrying operation into a commercial operation. The impact on the area of the incoming vehicles will be detrimental due to the vehicle emissions, also the treating of the material will cause dust/odour/fumes and the noise/disturbance will affect the area.

P M Kennedy.
