Comments	<input type="text" value="This application will have a detrimental effect on the environment in the area. The noise and disturbance caused by the increase in large lorries will impact everyone living in Washington and the surrounding villages. Traffic pollution is already an issue and will be made considerably worse. There will also be an effect on the natural environment here with animals and their habitat disturbed, plus an adverse effect on the landscape and character of the area. We should be protecting the environment not polluting it."/>
