

Rock Common Quarry, Washington Land Fill.  
FAO Mr Chris Bartlett

Dear Mr Chris Bartlett,

I wish to strongly protest to the above Application.

I note that Wiston Estates together with Messrs Dudman have once again submitted an application for landfill and processing plant, without it appears with no thought of namely residents in the Washington area.

Washington together with Ashington and indeed Storrington will be effected by an increase in traffic, noise to an already current problem with air pollution.

In addition to above this application appears to forget that adjacent to the site in question we have the Southdowns National Park, perhaps the Applicant has forgotten this special area or does not care !

Hopefully your office will go with the residents and strongly contest the said application.

Yours faithfully,

Peter H Wells
