Objection

There has been no meaningful consultation about a proposal which would have a serious visual impact on a very rural village setting. It is impossible to understand what other options exist that could achieve the same objective without causing the undeniable harm to the character of the village. The proposal would convert a green field site -one which typically contains crops into an industrialised setting totally out of character and keeping with the surrounding environment and village as a whole. It is difficult to understand why the water authority has chosen this solution over others that would be available and difficult to understand why there has been no effective consultation. The reason for the latter is ,I can only assume, an attempt to avoid having to record the objections or requests for clarification that such a process would have inevitably produced. I strongly oppose this proposal
