Comments	<input type="text" value="Crossing the Washington roundabout is like playing russian roulette. Adding further traffic and particularly lorries vastly increases the chances of a major accident. There will undoubtedly be large tailbacks of vehicles. There will be more noise and pollution which will affect residents from Steyning to Storrington. This will deter visitors from the National Park and impact the local economy. It is also likely to affect fresh drinking water and we know the Water Companies are not coping at present. I urge the Planning Committee to reject the application.."/>
