Comment for planning application WSCC/021/23

Application number Name

WSCC/021/23

Raymond John Hart Chilton

Address

CHERRY TREE COTTAGE, BABSHAM LANE, BABSHAM LANE, BOGNOR REGIS, PO21 5EL

Type of Comment Comments

Objection

The main objection to this application is the spread of dust and the health of local residents. Since this process commenced dust is a major issue. My property is clearly affected by simply examining the window panes which after cleaning soon become covered with fine grey dust. It is also apparent on any newly cleaned vehicle. As this is air born it must also be inhaled possibly causing respiratory conditions. Local children have developed asthma. Residents have also complained of sore eyes and irritation of the throat. It is known that the dust from crushed concrete contains silica from which silicosis can develope. I have been diagnosed as having the early symptoms of leukemia which have only been discovered since living here.

If the expansion is allowed then the vehicular movement will increase and Babsham Lane already suffers from the constant noise and dust from skip lorries. It can be clearly seen that the A259 from Elmbridge Farm towards Bogor is heavily coated with mud and dust which increases during dry weather. The noise is also harmful. Diggers and lorries operating 6 days a week.

This industrial process is not only antisocial it is harmful to public health and rather than allowing an extension it should be closed or move to a more isolated location away from any residential area or where edible crops are grown.
