

Comment for planning application WSCC/028/21

Application number	WSCC/028/21
Name	Sophie Rantzau
Address	4A, GORSE BANK CLOSE, GORSE BANK CLOSE, PULBOROUGH, RH20 3AQ
Type of Comment	Objection
Comments	<p>I understand that the previous landfill is now failing and leaching toxic water into the Honeybridge stream, that alone should shout that no other landfill could be acceptable let alone considered. Secondly, this area is the 4th highest of pollution in the UK, we do not need any increased traffic, we need this decreased to aid the wellbeing of the people living here. Thirdly, what will happen to the wildlife that habitat in this huge area. Please try not to undermine the intelligence of local people that the current lake will be too deep, yet the suggested lake to appear (at some point) will be equally deep. This is a huge area and an amazing opportunity to offer this space to the community to enjoy for walks, picnics and for other groups i.e. innercity charities to use the space also. Please think of all opportunities that this space could provide.</p>
