This is simply another attempt at 'landfill no matter how it is dressed up in wording in an area that should be protected for its fauna and flora as well as its natural aquifer. The impact on the natural habitat by the increased pollution both physical by importation and airborne through the increase in heavy traffic that will be part and parcel of such a scheme will be immensely negative. The current infrastructure struggles with the existing traffic load and an increase on the scale that will be introduced by this scheme will have safety and environmental consequences that are impossible to justify.
