	Whilst we have no problem with Mr Ayling,, We are very badly affected by the dust that the yard produces, we are continually cleaning our equipment and house due to the negative effects of the dust, My wife suffers with asthma and has now had to undergo tests to see if she has COPD, This is now a situation that is caused by inhalation of dust and we have no idea what that dust contains we hope that there are no carsonegenic particles in this as tis could be life threatening!
