

Comment for planning application WSCC/028/21

Application number	WSCC/028/21
Name	Tina Carol Cranwell
Address	ANGMERING WAY, 36, ANGMERING WAY, LITTLEHAMPTON, BN16 3RA
Type of Comment	Objection
Comments	<p>The old Quarry is a beautiful natural habitat sustaining wildlife, plants fungi and micro organisms. How much more destruction can the Sussex countryside take, you want to extract sand for building which is a big part of the problem already, house building is having a detrimental effect on our treasured countryside and wildlife, the creatures that live in these areas decimated for newbuilds are being pushed further and further into urbanised areas only to be treated with a total lack of respect and nothing more than pests, a couple of weeks ago a fox family were shot to death on the Littlehampton Academy site, their only crime making part of the school field their home, again this is due to massive house building in the area, and destruction of wildlife havens, with no provisions in mind for the wildlife or biodiversity of the area. The old quarry is an area where biodiversity is flourishing an area of natural beauty that local people can enjoy, however if your plan goes ahead the area will become highly polluted because of truck movement in and out on a daily basis, noise and water pollution will also blight this beautiful spot. You have to ask yourselves is all this devastation really necessary, the driving force behind this application is money, the extraction of sand to build more houses to make the wealthy wealthier, because lets face facts, the amount of social housing being build is minimal. Surely in the face of climate change a stance has to be taken, biodiversity is good for us and good for the planet and needs to be protected at all costs, pollution in the area is already high due to so many cars using small county roads which were not designed for the level of traffic that is now being seen, if this plan is allowed to go ahead the consequences will be devastating</p>
