Comments	<input type="text" value="This would be an absolute disaster, not only for the natural habitat it has become over the years to some amazing wildlife and plant life but also will be to the detriment of local properties and businesses, not to mention the additional traffic and noise it will add to this beautiful village of Washington being nearly at the centre of the beautiful South Downs Way. this should not go ahead. I myself frequent Washington Campsite and have done for years and the beautiful walks that also bring people to the site would be destroyed. How shortsighted to even consider this proposal."/>
