## Comment for planning application WSCC/028/21

Application number	WSCC/028/21
Name	russell goddard
Address	PUMP HOUSE COTTAGE, THE HOLLOW, THE HOLLOW, PULBOROUGH, RH20 3DA
Type of Comment	Objection
Comments	Further to our earlier filed objections we would like to state our concern with regards to potential flooding to the Honeywell Stream and the properties along its route with our house being only 10ft away. This winter has bought the stream to consistently and sometimes worrying high levels. Any increase in the volume of water being pumped albeit even a small increase could mean that the stream level reaches a height higher than the top of the tunnel under the Hollow and at this point the additional flow would begin to back up and flood our property, The Coach House, Coach House Barn and Rock Lodge Cottage.
	I believe this to be a very fine balance which could easily be pushed past the tipping point by any increase in water pumping which it sounds as im the new application will cause.
	We would be happy for a visit from the planning team to see our concerns.
