Our Ref: 19630/A3/JM/NM  
5 October 2012

Dear Mr Bartlett,

**BROADFORD BRIDGE-1 EXPLORATORY WELL SITE, WOOD BARN FARM,  
BROADFORD BRIDGE, WEST SUSSEX – CELTIQUE ENERGIE WEALD LTD (REF:  
WSCC/052/12/WC)**

I write further to our telephone conversation on 4 October 2012 regarding the proposed development of an exploratory well site on land at Wood Barn Farm, Broadford Bridge, and the use of unconventional or "fracking" technology. As discussed, Celtique Energie Weald Ltd would use conventional rather than unconventional drilling methods at this site should planning permission be granted.

The target reservoir for Celtique Energie's well at Broadford Bridge is the Triassic sandstone. This is a conventional [non-shale] reservoir anticipated to contain gas, and the rock is sufficiently permeable that gas should flow naturally into the well from the reservoir when produced. Therefore Celtique Energie can guarantee that it will not be using hydraulic fracturing on this well.

I trust that this is sufficient to clarify our position. However, should you require any further information with regards to this matter or any other aspect of the planning application, please do not hesitate to contact me on the details provided.

Yours sincerely

**JENNY MASSINGHAM**
