NOTE: The Survey has been oriented to the O.S. National Grid (OSGB36) via a Global Position System and the O.S. Active Network (OS Net) OSGB36(15). True OSGB36(15) coordinates have been established at a point near the site centre and a further OSGB36(15) point established to create a true O.S. bearing for angle orientation. All levels are based on OSDB datum. No scale factor has been applied to the survey and thus the Coordinate System is Arbitrary and not a standard O.S. Coordinate System which would require the Survey Station Table should be used to establish any on-site coordinates.

NOTE: any on-site coordinates.

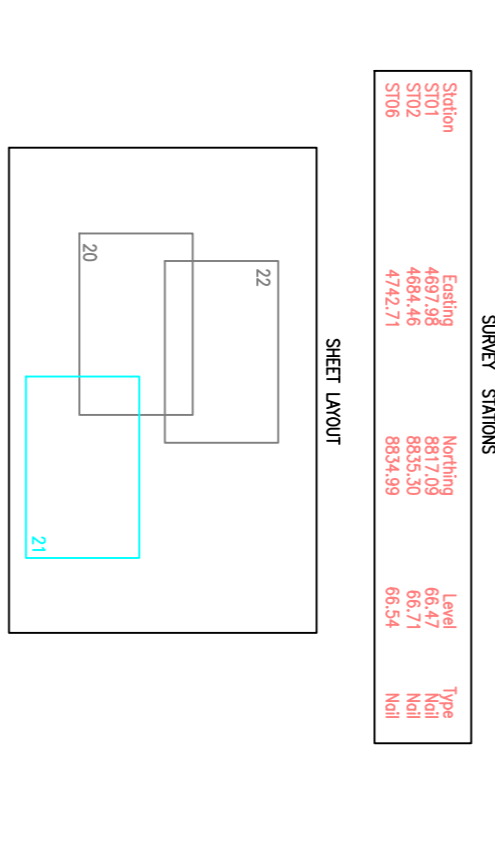

- This is a topographic survey and as such the physical features shown are not necessarily legal boundaries.
- Drainage information is by surface inspection only and cannot be guaranteed.
- This survey has been carried out on an accuracy comparable with the scales shown on the title sheet. Accuracy may vary depending on the way the digital means will not increase the accuracy of the survey.

Tree Information

400/7/8 bole dia.(mm)/spread(m)/height(m)
Tree species should be checked by an expert if identification is critical.
Trees show overage spread unless otherwise shown.
Tree heights are by visual estimation and are not measured
