SMPX SYMBOLS

Table with 4 columns: Symbol, Description, Symbol, Description. Includes symbols for 20m and 21m grid lines.

SHEET LAYOUT

Legend table listing various symbols and their corresponding features: A1 Motor Point, A2 Motor Point, A3 Motor Point, etc.

NOTE: The Survey has been oriented to the U.S. National Grid (NAD83) via a Global Positioning System and the U.S. Coordinate System (NAD83) has been established at a point near the site centre and a further (OSGB36(15) single orientation all levels are based on OSDB datum. Thus the Coordinate System is arbitrary and not a true U.S. Coordinate System which would require scale factors to be applied to all distances. Only one set of scale factors should be used to establish any one set of coordinates.

NOTE: This is a topographic survey and as such the physical features shown are not necessarily legal boundaries. Deedings information is by surface inspection only and commensurate with the scale shown on the title block of this drawing. Enlarging the drawing by digital means will not increase the accuracy of the original survey.
