

DRAINAGE & FLOOD RISK CONSULTATION

PROJECT: Remove drilling fluids and carry out an extended well test. This proposal is a two-stage activity: , 1) Pumping out previously used drilling fluids to ascertain any oil flow (up to 4 weeks) , 2) Should oil be seen to flow, an extended well test would be carried out over a period of 3 years.

Further information provided.

Revisions:

Date: 9 March 2020

Recommendation: (More Information Required / Objection / No Objection)

1 INTRODUCTION

- 1.1 West Sussex County Council (WSCC) Flood Risk Management Team has been consulted on the above proposed development in respect of drainage & flood risk.
- 1.2 The LLFA has withheld withdrawal of its objection to the above application pending confirmation that both that the EA had received and reviewed a hydrological risk assessment in support of the application and that it had withdrawn its objection.

2 UPDAT E AND DECISION

- 2.1 The LLFA has now received the EA's statutory response withdrawing its objections to the application.
- 2.2 In the absence of significant flood risk or drainage concerns relating to the application and in the light of the EA's withdrawal of its objection, the LLFA hereby withdraws its objection to the application.
