Objection

We strongly object to this planning application on the grounds of safety for our passengers, staff and vehicles. The roads is this area are simply not wide enough for this amount of large vehicle movements. The road are extremely narrow in place and the conflict between large vehicles and other vehicles would be extremely dangerous. There is very little in the way of footpaths in the area which would also be a cause for concern and could potentially have fatal consequences. This is a very sensitive bus routes as it connects various small villages with East Grinstead, Crawley and other onward towns and city's, and due to the narrowness or the roads we only use our smaller vehicles on this route. There is one particular area just as you enter Saint Hill Green that is very narrow and is on a blind bend. Assuming vehicle movements would only take place between 0900-1700 then this would mean 4 HGV movements an hour. If this is past by planning then very strict guidelines need to be laid down to the HGV's when using this road and full monitoring of the road needs to be done. I hope common sense prevails and the application is refused.
