Comments	This scheme is obscene! Allowing heavily loaded trucks through the middle of East Grinstead town centre and adjacent roads for a very extended period of time, regardless of other possible routes is madness and a threat to the safety of all who walk or drive or cycle through the town, and the adjacent areas. It is just unbelievable and is a mindless lack of consideration for the residents, users and workers, not to mention the "Carbon Footprint" that is generated by this long-term constant heavy traffic. Is this landfill site restoration really necessary? Kindly note my objection, as a user of these East Grinstead roads.
