Address	COPTHORNE ROAD, 68, COPTHORNE ROAD, EAST GRINSTEAD, RH19 2NU
Type of Comment	Objection
Comments	Hi. I object due to environmental impact on our community. Our roads are falling apart already. Long queues to and from town. This will add to the already over stretched roads. Also 35 heavy goods vehicles will polite our air and to go threw a small town Also past schools. This will have a direct impact on many road users and as I use a mobility scooter due to disability I don't want the pollution to get into my lungs. I already have COPD and this would stop me and many disabled people wanting to go out. Noise dust pollution. Making our roads that are full of potholes even more dangerous. My life is difficult enough trying to cross roads without continuous 2yr of 35 vehicles a day. These vehicles will only make potholes turn in to craters. Also some roads proposed are already narrow and dangerous for cars let alone a vehicle the size you propose. There are other ways to cap landfill. I suggest one the other options is discussed further. We all need to consider our environment impact on the world. Our roads in this area is at breaking point.
