Planning application WSCC/004/20 - Evergreen Farm

Dear Chairman of the Planning Committee

I would be grateful if the following comments could be circulated to the Members of the Planning Committee before the above planning application is considered.

I am concerned about the traffic implications if the above planning application is approved. If 15,000 deliveries of 10 cubic metres of soil in 32 tonne articulated lorries are allowed to enter the Evergreen Farm site via West Hoathly Road from East Grinstead, deposit their loads, and exit the site via the junction of Standen Drive and the West Hoathly Road further south there will be severe traffic implications for the local community. At that junction the empty lorries would turn left and at Saint Hill Green would turn sharply right to return to East Grinstead via Saint Hill Road and Hazelden crossroads.

I note that the supporting documents with the application include two Road Safety audits, one for incoming traffic and the other for exiting vehicles. The latter omits the right turn at Saint Hill Green which is very difficult in a private car because of the very narrow roads and extremely poor visibility. How can 32 tonne lorries safely negotiate the turn at the Saint Hill green? I request that this route be reconsidered.

Yours sincerely

Margaret Collins
