Objection

I strongly object to this application. The level of HGV traffic is unacceptable given the state of St Hill Road & the dangers involved in HGVs turning left into West Hoathly Road & travelling up past the entrance to Standen. That part of the road is barely wide enough for two cars to pass & often involves cars having to wait for each other & passing very slowly going down the hill towards the entrance to Evergreen Farm. Traffic entering & leaving Standen is also a concern & will be affected by HGVs passing the entrance. The turn into West Hoathly Road at St Hill Green is simply not suitable for HGV vehicles, is not wide enough & is dangerous in terms of traffic coming down the hill from the direction of Standen towards St Hill Green. There is an already dangerous loss of line of sight when you come down the hill towards the junction. In addition there are houses opposite the green which have limited line of sight when leaving their drives. The bridge over the Worth Way on Imberhorne Lane is way too narrow to allow the passage of constant HGV traffic. Again, line of sight on the approach to the bridge is already restricted which makes it dangerous. I wonder if the bridge itself is also sufficiently robust to take the level of HGV traffic proposed. Overall the level of HGV traffic involved in the project is unacceptable on what amount to country lanes which have limited line of sight in places. I object strongly to this proposal.
