---

Hello,

We are objecting to these works for the following:

Dust, Odour & Fumes. The Dust, Odour & Fumes will affect the people we support leaving at Beechcroft care center and Hazel Lodge, which lie directly next to this site. The proximity of the works to the people who live with profound, multiple learning difficulties which some are life limiting, have not been taken into consideration with the reports given and the risk to the health of these vulnerable people has not been considered, so the works should not go ahead.

Noise. The noise from these works, which will cause significant impact due to the close proximity of the works to our site, which affect the people we support a great deal. Again, we feel this has not been taken into consideration with the reports in this application.

The traffic generation for these works will add to the noise and pollution, due to the proximity of our site to the works.

We feel as if the vulnerable people living directly next to this site has not been taken into consideration by the reports on this application, and the works proposed should not proceed due to the risks stated.

We have attached a site view which shows the close proximity of the works.

Kind regards

Mark

Mark East | Director of Safety and Support Services | SHC, Tylden House, Dorking Road, Warnham, RH12 3RZ
