Comment for planning application WSCC/036/20

Application number	WSCC/036/20
Name	Chris Sprules
Address	THE MILLERS, 18, THE MILLERS, ARUNDEL, BN18 0LE
Type of Comment	Objection
Comments	Cycling Walking Horse Riding NMU and Old Canal These comments relate to the above issues only and not to the planning application per se In todays climate, Post Covid issues, local flooding, Air quality and peoples well being it is disappointing that the above plan has been completed with much generic comment and very little substance. This is a golden opportunity for a new recycling plant to really demonstrate that it is in the business of supporting this much wider Sustainable agenda Old Canal Greenway - There are plans for the old canal to be repurposed into a Greenway for all NMU users. The proposed housing site next door has identified the canal route in its initial plans. Benefit would have been gained if the northern side of this site allowed for this path to be continued thus creating a substantial section of the route this would mean a route being cut through the mushroom section of the land. Cycling and Walking NMU In addition to the above more thought should be given to how the site links to the National cycle route alongside the A259 (the local cycle route via Yapton on the map doesn't exist) and local communities this could be improvements to the existing infrastructure or even new infrastructure. With E scooters and e bikes set to revolutionise sustainable travel thought needs to be given to people travelling to the site, cycle parking facilities and charging points. Maybe even a staff scheme to buy electric bikes
