Objection

I (regretfully) bought my property 2 years ago to escape the noise and pollution of a town. Now with the prospect of my views across fields from my property being destroyed with the proposed housing development, with the current noise of traffic, speeding towards the industrial estate along Rollaston park, I have to keep my windows closed at the front, even during summer to drown out the traffic noise. I hope the traffic does not increase along this road, which is already an accident waiting to happen. Trying to pull out of my Close on a daily basis is a nightmare turning right, as the traffic coming from the industrial estate from the left at high speed daily is so dangerous. We already have to contend with the foul smell coming from the sewage plant, and the regular burning smells from I don't know where. The dust and the rubbish along Rollaston park is disgusting, and never cleaned up. Who on earth would want to buy a new house here when they start building anyway? I moved here for some peace and quiet, being semi rural, but it's more like living on an industrial estate, and will be even more so if this building goes ahead! I am a 'Sussex Hum' sufferer, which I suggest you looking up if you don't know what that is, so very susceptible to any vibrations through the ground, causing massive sleep deprivation, amongst other related health issues because of it. I would like to move away in the future when I retire, but if this building goes ahead, and the housing development, my current property will be devalued so much, that I will be stuck here forever! I cannot tell from the plans where traffic will be coming in and out of, so please clarify. Why can't they build this away from where there is a housing estate? Until something is done about the speed of vehicles in Rollaston park, NOTHING else should be built around here, as very soon I will be witnessing a death on the road from my window. I cannot stress enough about how bad the current traffic is, so PLEASE DO NOT ADD TO IT! Or to the dust, or to the foul smells, or to the vibrations and noise. I never knew how semi-rural living could be noisier, smellier, or more polluted than living in the centre of a town previously. Therefore, I would like to say, I STRONGLY OBJECT, unless I can be assured, that none of the above will occur, and ruin my life any further!
