Objection

I object strongly to this application firstly the Location is going to be in a largely residential area with 1500 new homes planned right next door there are already several other applications for housing to be increased in the area which the traffic impact has not been seen yet as the properties are still currently being planned & built. The size & visibility of the main building is enormous & it will be visible for miles & will be a blight on the whole area. Traffic impact yet more HGV's coming from all the surrounding Counties when our local roads already are unable to cope with all the recent extra traffic movements that you have allowed to be added to our area. The access to this site is totally unsuitable, all the traffic will be on Church Lane down to the A259 with no improvements planned the junction of Horsmare Green Lane & Church Lane is already very dangerous & I have witnessed many near misses with these extra lorry movements I can foresee grid lock happening daily rather than occasionally as is the case now, the mini roundabout at Climping was not built for large HGV's & therefore could not cope with even more HGV's using it. The Environmental impact that this facility will have on our area with possible issues regarding gas, dust & smells could effect the health of local residents within several miles & the mental well being of local residents not being able to get from A to B in an acceptable time frame because of all the extra traffic needs to be considered in my opinion.
