Objection

Objection to Waste Burner at Ford Village. This proposal has to be quoshed. Over and above all the village and rural environment arguements, it should be abundantly obvious that the damage to local people will be huge.... 275,000 tonnes per annum of waste moving along the A259 and then onto a B road..... proposals to build nearly 3000 new houses in the same area.... and a potential flood risk. The Villages will just be a delight. Lets not kid ourselves, this is essentially an oversized incinerator for rubbish coming in from all over the Sussexes and Hampshire and at best is an ugly building as a drawing . Perhaps smaller units spread across the catchment area would be a better idea economies of scale being offset by savings in haulage miles a need to spend massively on infrastructure. I have driven past the burner at Colnbrook which was built on land already blighted by the M4/M25 Motorways and the noise of Heathrow... the area is highly industrialised and housing of any kind is sparse. I think its time for sensitive regeneration in the area especially with the ravages of Covid 19 yet to be assessed. We need good quality housing aimed at first time buyers to allow our younger generation a chance to grow up in decent surroundings. If this proposal is truelly needed, then it must be built in an area that is already blighted by something else and has a low impact on the local population. JD
